

CONTROL CIRCUIT (see also ALL COMPONENTS) :—*contd.*

<i>Other requirements</i>	<i>Design Leaflet</i>	<i>Paragraph</i>
Accessibility	B.5	7
Assembly, precautions against wrong assembly	B.5	24
Castings	B.5	11
Fairleads	Z.3	13
Fasteners for inspection doors	Z.3	17
High tensile pins in control circuits	Z.3	22
Locking	Z.3	12
Protection of circuits	B.5	7
Pulleys, guarding of	B.5	7
Servo control	B.5	8
Slackness in controls—see Notice to Aircraft Owners and Ground Engineers No 30/1930.		
Stops to limit travel	B.5	7
Toe straps for rudder bars	Z.3	18
Trailing edge flaps, control circuit	B.5	2
Trailing edge tabs, control circuit	B.5	1
Welding	B.5	10

COOLING SYSTEM :—

General requirements	D.4	—
Reserve water	D.4	8
Thermometer	D.4	10
Thermometer	E.1	2
Definitions	A.1	4
De-icing requirements	G.5	—
Distribution of load between upper and lower planes	B.4	4
Doping—see Notice to Aircraft Owners and Ground Engineers No. 19/1929	B.5	12
Drain holes in metal components	Z.3	15
Drainage for spilt fuel	Z.5	6
Drainage holes to protect glued joints	B.5	23

DRAWINGS, SPECIAL INFORMATION TO BE GIVEN ON :—

Aircrew drawings	B.8	1
Castings, inspection requirements	B.5	11
Chains, ultimate load and test requirements	B.3	14
Direction of annual rings on drawings of important wooden members	G.3	3
Doping scheme to be specified	B.5	12
Frise type ailerons, maximum upward setting	B.5	3
Glued joints not structurally important	B.5	23
Materials of construction, specification of	B.1	4, 5
Method of attaching fabric to be specified	B.5	12
Methods of protection	G.3	—
Radiator test pressure	D.4	11
Tyre dimensions	B.9	5
Wireless installations	A.7	8
Dual ignition	C.7	1
Electrical apparatus	E. Intro-duction.	—
Electrical apparatus, installation of	E.2	—
Elevator—see TAIL PLANE.		
Emergency exits—see CABIN.		

ENGINE INSTALLATION (see also FUEL SYSTEM) :—

Engine controls	D.1	5
Exhaust	D.1	9
Fireproof bulkhead	D.1	Appendix
Ignition	D.1	6
Ignition	C.7	1
Induction system	D.1	8
Primer	D.1	7
